

Fraction War

Materials:

- > Deck of Cards
- > Paper
- > Pencil
- > Fraction Strips/Fraction Circles

Reminders:

Remove all face cards.

Greater number is the denominator (bottom number).

Instructions: In this two player game, players will compare fractions. Before playing, remove all face cards from the deck. Split the deck between the two players. Each player will draw two cards. The smallest number will represent the numerator (top number) and the larger number will represent the denominator (bottom number). Students can use their fraction strips or fraction circles to compare the two fractions. Which ever player has the greater fraction gets to keep all four cards. If both players get an equal fraction, they each draw two more cards. Whoever wins the second time gets to keep all 8 cards.
